REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. Applicant has demonstrated that the aqueous fuel cell coolant composition, having 1,3-propanediol which has an electrical resistivity of greater than 250 Kohm-cm, is not suggested by the prior art of record. Specifically, the '789 patent does not inherently present a necessary flow of characteristics of said aqueous 1,3-propanediol having an electrical resistivity of greater than 250 Kohm-cm, as shown in the declaration submitted by applicant on September 14, 2007, because said Declaration shows, that all aqueous 1,3-propanediols do not inherently possess electrical resistivity of greater than 250 Kohm-cm. With respect to the '979 patent, the compositions comprises nitrates and quaternary salts which increase ionic content and decrease electrical resistivity. Therefore, in view of the arguments and criticality shown, the examiner contends that the prior art of records does not present a prima facie case of obviousness and therefore the claims are allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Necholas Ogden, Jr. whose telephone number is 571-272-1322. The examiner can normally be reached on M-Thu.
